

# Face Material Specification for Springflex®

## Important:

Size of face material for Springflex is the box size plus 140mm length and height.

Print Bleed Area: 20mm on each edge of the box size.

## Spring Position Eyelets

The starting position for eyelet punching is 60mm in from the corners and every 150mm or 100mm, dependant on box size. Punch holes are 3mm from the edge of envelope.

Always use the recommended substrates to ensure maximum durability.
